

# Slash 4X4 Low-CG Conversion Kit

## Lower CG, Higher Corner Speed, Lower Lap Times

Performance-proven with the Slash 4X4 Ultimate and 1/10 Rally models, Traxxas' Low Center-of-Gravity chassis is now available as a complete conversion kit for the Slash 4X4. The Low-CG Conversion Kit lowers the chassis, battery\*, and electronic components\* to bring all the advantages of a low center of gravity to the award-winning 4WD short-course truck. No matter where you want to race, on the track or off, you will experience superior handling and better corner speed. The conversion kit includes all the parts and hardware required to convert one Slash 4X4 to the Low-CG configuration.

**Includes all parts and hardware for Low-CG conversion**

### Features:

- Complete kit, no additional parts required
- Lowers chassis approximately one inch
- Battery positioned 50% lower compared to standard chassis
- Low-CG enhances handling and increases cornering speed
- Genuine Traxxas quality and precision
